SUMMARY

iOS and macOS Software Engineer with 3+ years shipping native **Swift** products, who builds **AI** into both the product and the engineering process. Designed **local LLM** evaluation and **multi-agent workflows** that automate release verification, build validation, and deployment checks on a platform serving **10,000+ devices**. Selected among the **top 700 teams from 57,000+ developers** in the **Google Cloud Agentic AI Hackathon 2025**. Fluent in **SwiftUI**, **UIKit**, **Swift Concurrency**, **Core ML**, and modern AI developer tooling, with a published App Store app of my own.

WORK EXPERIENCE

42Gears Mobility Systems Pvt. Ltd.

February 2023 – Present

Bengaluru, India | Unified Endpoint Management (UEM) SaaS

iOS & macOS Developer

July 2023 – Present

- Designed and deployed **local LLM** evaluation and **multi-agent AI workflows** that automate the release pipeline build verification, deployment validation, and regression checks measurably reducing human error in release sign-off. *[ADD IF TRUE: X hours saved per release / defect-escape reduction]*
- Ran LLM inference **locally** rather than through third-party APIs to keep proprietary source and enterprise build artifacts inside the security boundary. *[CONFIRM: which runtime Ollama, llama.cpp, MLX, Apple Foundation Models?]*
- Built an internal AI-assisted diagnostics utility adopted by **20+ engineers and QA** that parses live logs, inspects job payloads, and surfaces runtime state, shortening debugging cycles. *[CONFIRM: is the AI layer part of this tool?]*
- Built and shipped native **Swift** features across **SwiftUI** and **UIKit** for iOS and macOS applications running on **10,000+ enterprise endpoints**.
- Migrated legacy asynchronous code to **Swift Concurrency** (async/await, actors, structured tasks) from **GCD**, reducing concurrency-related crash rates by **40%**.
- Created structured analytics and event-processing pipelines capturing device events, health metrics, and network usage diagnostics the telemetry substrate for automated analysis and reporting.
- Optimized **Core Data** persistence via model redesign, indexing, and batch operations, reducing data lookup latency by **50%**.
- Engineered a resumable chunked **Download Manager** with concurrent worker queues over **URLSession**, reducing transfer failure rates by **35%**.
- Led architectural migration from **MVVM** to **VIPER** applying **SOLID** and dependency injection, making core business logic unit-testable. *[CONFIRM: SOLID framing]*
- Architected macOS system agents with **XPC**, **LaunchDaemon**, and **NetworkExtension** for background policy enforcement and network traffic filtering.
- Automated build, signing, notarization, packaging, and distribution through **GitLab CI/CD**, and maintained **XCTest**, **XCUITest**, **Playwright**, and **Appium** regression suites. *[CONFIRM: XCTest ownership]*

iOS Developer Intern

February 2023 – June 2023

- Delivered features in **Swift**, **UIKit**, and **SwiftUI** with secure local storage via **Core Data**, **UserDefaults**, and **Keychain**; worked in **Agile** sprints with **Jira** and **SonarQube** quality gates.

PROJECTS

Agentic Gig Platform *Next.js, Firebase, Python, Kotlin, Google Cloud*

Google Cloud Agentic AI Hackathon 2025

- Built an **AI agent** platform delivering expert agricultural advice to farmers; selected among the **top 700 teams out of 57,000+ developers** in the Google Cloud Agentic AI Hackathon 2025.
- github.com/abhikumar002/Agentic-Gig-Project

CodeForge DSA & Interview Prep IDE *Swift, SwiftUI, Swift Concurrency, JavaScriptCore*

Live on the App Store

- Designed, built, and published a native **macOS and iOS** coding-practice IDE as sole developer 5 practice tracks, a dual-path execution engine (subprocess and **JavaScriptCore**), an interactive test runner, and a 2D matrix visualizer fully offline, no server dependency.
- Owned architecture, tests, **TestFlight** distribution, **App Store Connect** submission, and App Review approval. *[ADD IF TRUE: downloads / rating]*
- apps.apple.com/app/id6787703716 | github.com/sachin6174/SwiftForge

Secure Text *JavaScript, Chrome Extension APIs*

Published on Chrome Web Store

- Chrome extension for Base64 and Base32 text encoding and decoding. chromewebstore.google.com/detail/secure-text

TECHNICAL SKILLS

AI & Automation: Local LLMs, Generative AI (GenAI), AI agents, multi-agent workflows, agentic pipelines, LLM evaluation, prompt engineering, Core ML (on-device inference), Claude Code, GitHub Copilot, Cursor, AI-assisted code review, release automation

Languages: Swift, Objective-C, C++, JavaScript, Python, Kotlin, Bash/Shell, SQL

iOS & macOS: SwiftUI, UIKit, Foundation, Combine, Swift Concurrency (async/await, actors, Sendable), GCD/DispatchQueue, Core Data, SwiftData, Core ML, Core Location, CryptoKit, Keychain, NetworkExtension, XPC, LaunchDaemon, Auto Layout

Architecture: MVVM, VIPER, MVC, Clean Architecture, SOLID principles, Protocol-Oriented Programming, Dependency Injection, Modularization, System Design

Testing & Quality: XCTest, XCUITest, Unit Testing, TDD, Playwright, Appium, SonarQube, Xcode Instruments, Code Review

Networking & Cloud: REST APIs, URLSession, JSON/Codable, Firebase, Google Cloud, SQLite, Next.js

Build & Release: Xcode, SPM, CocoaPods, Fastlane, Git, GitLab CI/CD, GitHub Actions, TestFlight, App Store Connect, Code Signing, Notarization, Jira, Agile/Scrum

EDUCATION

Chandigarh Group of Colleges, Landran

Bachelor of Engineering in Computer Science and Engineering CGPA: 7.9/10

August 2019 – May 2023

Mohali, Punjab, India

CERTIFICATIONS

- **System Design** and **Data Structures in C++** Coding Ninjas, 2022. Solved *[ADD IF TRUE: N]*+ problems on LeetCode.
