SUMMARY

iOS and macOS engineer with 3+ years owning architecture and code quality on a production platform serving **10,000+ devices**. Led a module-level migration from **MVVM** to **VIPER** applying **SOLID** and **Clean Architecture** principles, modernized concurrency with **Swift Concurrency** to cut crash rates **40%**, and tuned **Core Data** and networking layers for **50%** and **35%** improvements respectively. Practiced in unit and UI testing, dependency injection, performance profiling with **Instruments**, code review, and **CI/CD** release automation.

WORK EXPERIENCE

42Gears Mobility Systems Pvt. Ltd.

February 2023 – Present

Bengaluru, India | Unified Endpoint Management (UEM) SaaS

iOS & macOS Developer

July 2023 – Present

- Migrated core modules from **MVVM** to **VIPER**, applying **Clean Architecture** boundaries and **dependency injection** to decouple business logic from view controllers and make previously untestable code unit-testable.
- Designed reusable, protocol-oriented modules and shared components for job execution, policy enforcement, and device telemetry, eliminating duplicated logic across the macOS agent and helper tools.
- Modernized asynchronous execution by migrating legacy **GCD/DispatchQueue** code to **Swift Concurrency** (async/await, actors, structured tasks), reducing concurrency-related crash rates by **40%**.
- Tuned **Core Data** offline storage through model redesign, indexing, and batch fetch and update operations, reducing lookup latency by **50%** while preserving data integrity at fleet scale.
- Engineered a resilient **Download Manager** with resumable chunked transfers, progress callbacks, and bounded concurrent worker queues, reducing transfer failure rates by **35%**.
- Profiled and eliminated performance and memory bottlenecks with **Xcode Instruments** (Time Profiler, Leaks, Allocations), resolving retain cycles and tightening **ARC** memory management in long-running background processes.
- Built and maintained **Playwright** and **Appium** end-to-end automation gating every release, catching regressions before QA hand-off.
- Automated the release pipeline in **GitLab CI/CD** build, static analysis, signing, notarization, packaging, and distribution and enforced quality gates through **SonarQube**.
- Drove framework modernization by replacing deprecated third-party libraries with first-party Apple SDKs and migrating plaintext storage to encrypted **CryptoKit/Keychain** formats with full backward compatibility.
- Architected macOS system components using **XPC** inter-process communication, **LaunchDaemon** daemonization, and **NetworkExtension** providers, alongside Swift and **Bash** scripting for PKG/DMG install and upgrade flows.
- Built an internal diagnostics utility adopted by **20+ engineers and QA** for real-time log parsing, payload inspection, and live state inspection, and participated in **code reviews** across the macOS agent codebase.
- Reduced manual release verification by automating build and deployment validation with local **LLM** evaluation and **multi-agent** workflows.

iOS Developer Intern

February 2023 – June 2023

- Delivered features in **Swift**, **UIKit**, and **SwiftUI** with asynchronous programming patterns and secure local storage via **Core Data**, **UserDefaults**, and **Keychain**.
- Worked in **Agile/Scrum** sprints with **Jira**; contributed to PKG/DMG packaging, code signing, and notarization.

PROJECTS

CodeForge DSA & Interview Prep IDE *Swift, SwiftUI, Swift Concurrency, JavaScriptCore, XCTest* **Live on the App Store**

- Architected and shipped a native **macOS and iOS** IDE as sole developer, designing a dual-path execution engine (subprocess and **JavaScriptCore**) behind a single protocol abstraction so either backend is swappable per platform.
- Owned the full lifecycle: modular architecture, unit tests, **TestFlight** distribution, **App Store Connect** submission, and App Review approval.
- apps.apple.com/app/id6787703716 | github.com/sachin6174/SwiftForge

Secure Text *JavaScript, Chrome Extension APIs*

Published on Chrome Web Store

- Built and published a Chrome extension for Base64 and Base32 text encoding and decoding using Chrome storage APIs.
- chromewebstore.google.com/detail/secure-text | github.com/sachin6174/secure-text-chrome-extension

TECHNICAL SKILLS

Architecture & Design: SOLID principles, Clean Architecture, VIPER, MVVM, MVC, MVP, Protocol-Oriented Programming, Dependency Injection, Design Patterns (Delegation, Observer, Singleton, Factory, Adapter), Modularization, Reusable Component Libraries, System Design, OOP

Testing & Quality: XCTest, XCUITest, Unit Testing, UI Testing, Integration Testing, TDD, Test Automation, Code Review, SonarQube, Playwright, Appium, Debugging, Xcode Instruments (Time Profiler, Leaks, Allocations)

Languages: Swift, Objective-C, C++, JavaScript, Bash/Shell scripting, SQL

iOS & macOS: SwiftUI, UIKit, Foundation, Combine, Swift Concurrency (async/await, actors, Sendable), GCD/DispatchQueue, Multithreading, Memory Management/ARC, Core Data, SwiftData, Core Location, CryptoKit, Keychain, NetworkExtension, XPC, LaunchDaemon, Core ML, Auto Layout

Networking & Data: REST APIs, URLSession, JSON, Codable, Offline Storage, SQLite, Caching, Firebase

Build & Delivery: Xcode, Swift Package Manager (SPM), CocoaPods, Fastlane, Git, GitLab CI/CD, GitHub Actions, TestFlight, App Store Connect, Code Signing, Notarization, PKG/DMG, Jira, Agile/Scrum

AI & Automation: Local LLMs, AI agents, multi-agent workflows, Claude Code, GitHub Copilot, Cursor, release automation

EDUCATION

Chandigarh Group of Colleges, Landran

Bachelor of Engineering in Computer Science and Engineering CGPA: 7.9/10

August 2019 – May 2023

Mohali, Punjab, India

ACHIEVEMENTS & CERTIFICATIONS

- **System Design** Coding Ninjas, February 2022: scalability, load balancing, database design, and microservices architecture.
- **Data Structures in C++** Coding Ninjas, April 2022: core data structures, algorithms, and complexity analysis.
- **Google Cloud Agentic AI Hackathon 2025** selected among the **top 700 teams out of 57,000+ developers**.
