SUMMARY

iOS Software Engineer with 3+ years shipping native **Swift** applications for iOS and macOS, with a published **App Store** app of my own and production features running on **10,000+ devices**. Hands-on with **SwiftUI**, **UIKit**, **MVVM** and **VIPER**, **Swift Concurrency**, **Core Data**, and **REST API** integration, with a strong record on performance profiling, memory management, and unit testing. Comfortable owning a feature end to end design review, implementation, tests, code review, CI/CD, and App Store Connect release.

WORK EXPERIENCE

42Gears Mobility Systems Pvt. Ltd.

February 2023 – Present

Bengaluru, India | Unified Endpoint Management (UEM) SaaS

iOS & macOS Developer

July 2023 – Present

- Built and shipped native **Swift** features for iOS and macOS applications used across **10,000+ enterprise devices**, covering UI in **SwiftUI** and **UIKit**, business logic, persistence, and networking.
- Migrated core modules from **MVVM** to **VIPER**, applying dependency injection to separate business logic from view controllers, improving testability and reducing regressions.
- Migrated legacy asynchronous code to **Swift Concurrency** (async/await, actors, structured tasks) from **GCD** and **DispatchQueue**, cutting concurrency-related crash rates by **40%**.
- Optimized **Core Data** persistence through model redesign, indexing, and batch fetch and update operations, reducing data lookup latency by **50%**.
- Engineered a resilient **Download Manager** with resumable chunked transfers, progress callbacks, and concurrent worker queues over **URLSession**, reducing transfer failure rates by **35%**.
- Profiled and fixed performance and memory bottlenecks using **Xcode Instruments** (Time Profiler, Leaks, Allocations), resolving retain cycles and improving responsiveness on long-running background work.
- Integrated **REST APIs** with **JSON/Codable** models and built structured analytics and event pipelines capturing device events, health metrics, and usage diagnostics for administrator dashboards.
- Built and maintained **Playwright** and **Appium** test automation validating regression workflows and end-to-end device-management actions before every release.
- Modernized the codebase by replacing deprecated third-party libraries with first-party Apple SDKs and migrating plaintext local storage to encrypted **Keychain** and **CryptoKit** storage, preserving backward compatibility.
- Collaborated with product, QA, and backend engineers in **Agile** sprints, participated in **code reviews**, and built an internal debugging utility adopted by **20+ engineers** to shorten triage cycles.
- Shipped releases through **GitLab CI/CD** with code signing, notarization, and automated build distribution; contributed macOS system-level modules (**NetworkExtension**, **XPC**, **LaunchDaemon**) for traffic filtering and background agents.

iOS Developer Intern

February 2023 – June 2023

- Delivered production features in **Swift**, **UIKit**, and **SwiftUI** using asynchronous programming patterns, with secure local storage via **Core Data**, **UserDefaults**, and **Keychain**.
- Worked in **Agile/Scrum** sprints with **Jira**, enforcing code quality gates through **SonarQube** static analysis.

PROJECTS

CodeForge DSA & Interview Prep IDE *Swift, SwiftUI, Swift Concurrency, JavaScriptCore, XCTest* **Live on the App Store**

- Designed, built, and published a native **macOS and iOS** coding-practice IDE to the **App Store** as sole developer 5 practice tracks, a dual-path execution engine (subprocess and **JavaScriptCore**), an interactive test runner, and a 2D matrix visualizer.
- Owned the complete release path: **SwiftUI** interface design following Apple **Human Interface Guidelines**, offline-first persistence, unit tests, **TestFlight** beta distribution, **App Store Connect** submission, and App Review approval.
- apps.apple.com/app/id6787703716 | github.com/sachin6174/SwiftForge

Secure Text *JavaScript, Chrome Extension APIs*

Published on Chrome Web Store

- Built and published a Chrome extension providing Base64 and Base32 text encoding and decoding backed by Chrome storage APIs.
- chromewebstore.google.com/detail/secure-text | github.com/sachin6174/secure-text-chrome-extension

TECHNICAL SKILLS

Languages: Swift, Objective-C, C++, JavaScript, Bash/Shell, SQL

iOS Frameworks: SwiftUI, UIKit, Foundation, Combine, Swift Concurrency (async/await, actors, Sendable), GCD/DispatchQueue, Core Data, SwiftData, Core Location, Core ML, CryptoKit, Keychain Services, Auto Layout, App Lifecycle, Human Interface Guidelines

Architecture: MVVM, MVC, VIPER, Clean Architecture, SOLID principles, Protocol-Oriented Programming, Dependency Injection, Delegation, Observer, Singleton, Modularization, Reusable UI Components, System Design

Testing & Performance: XCTest, XCUITest, Unit Testing, UI Testing, TDD, Xcode Instruments (Time Profiler, Leaks, Allocations), Memory Management/ARC, Multithreading, Debugging, Code Review, Playwright, Appium, SonarQube

Networking & Data: REST APIs, URLSession, JSON, Codable, SQLite, Firebase, Offline Storage, Caching

Tooling & Release: Xcode, Swift Package Manager (SPM), CocoaPods, Fastlane, Git, GitLab CI/CD, GitHub Actions, TestFlight, App Store Connect, Provisioning Profiles, Code Signing, Jira, Agile/Scrum

Also: NetworkExtension, XPC, LaunchDaemon, PKG/DMG packaging, notarization, Local LLMs, AI agents, release automation

EDUCATION

Chandigarh Group of Colleges, Landran

Bachelor of Engineering in Computer Science and Engineering CGPA: 7.9/10

August 2019 – May 2023

Mohali, Punjab, India

ACHIEVEMENTS & CERTIFICATIONS

- **Google Cloud Agentic AI Hackathon 2025** selected among the **top 700 teams out of 57,000+ developers**; built an AI advisory platform for farmers using Next.js, Firebase, Python, and Kotlin.
- **System Design and Data Structures in C++** Coding Ninjas, 2022.
